

INVISIBLE SUBSTANCE

IN THE SPIRIT REALM

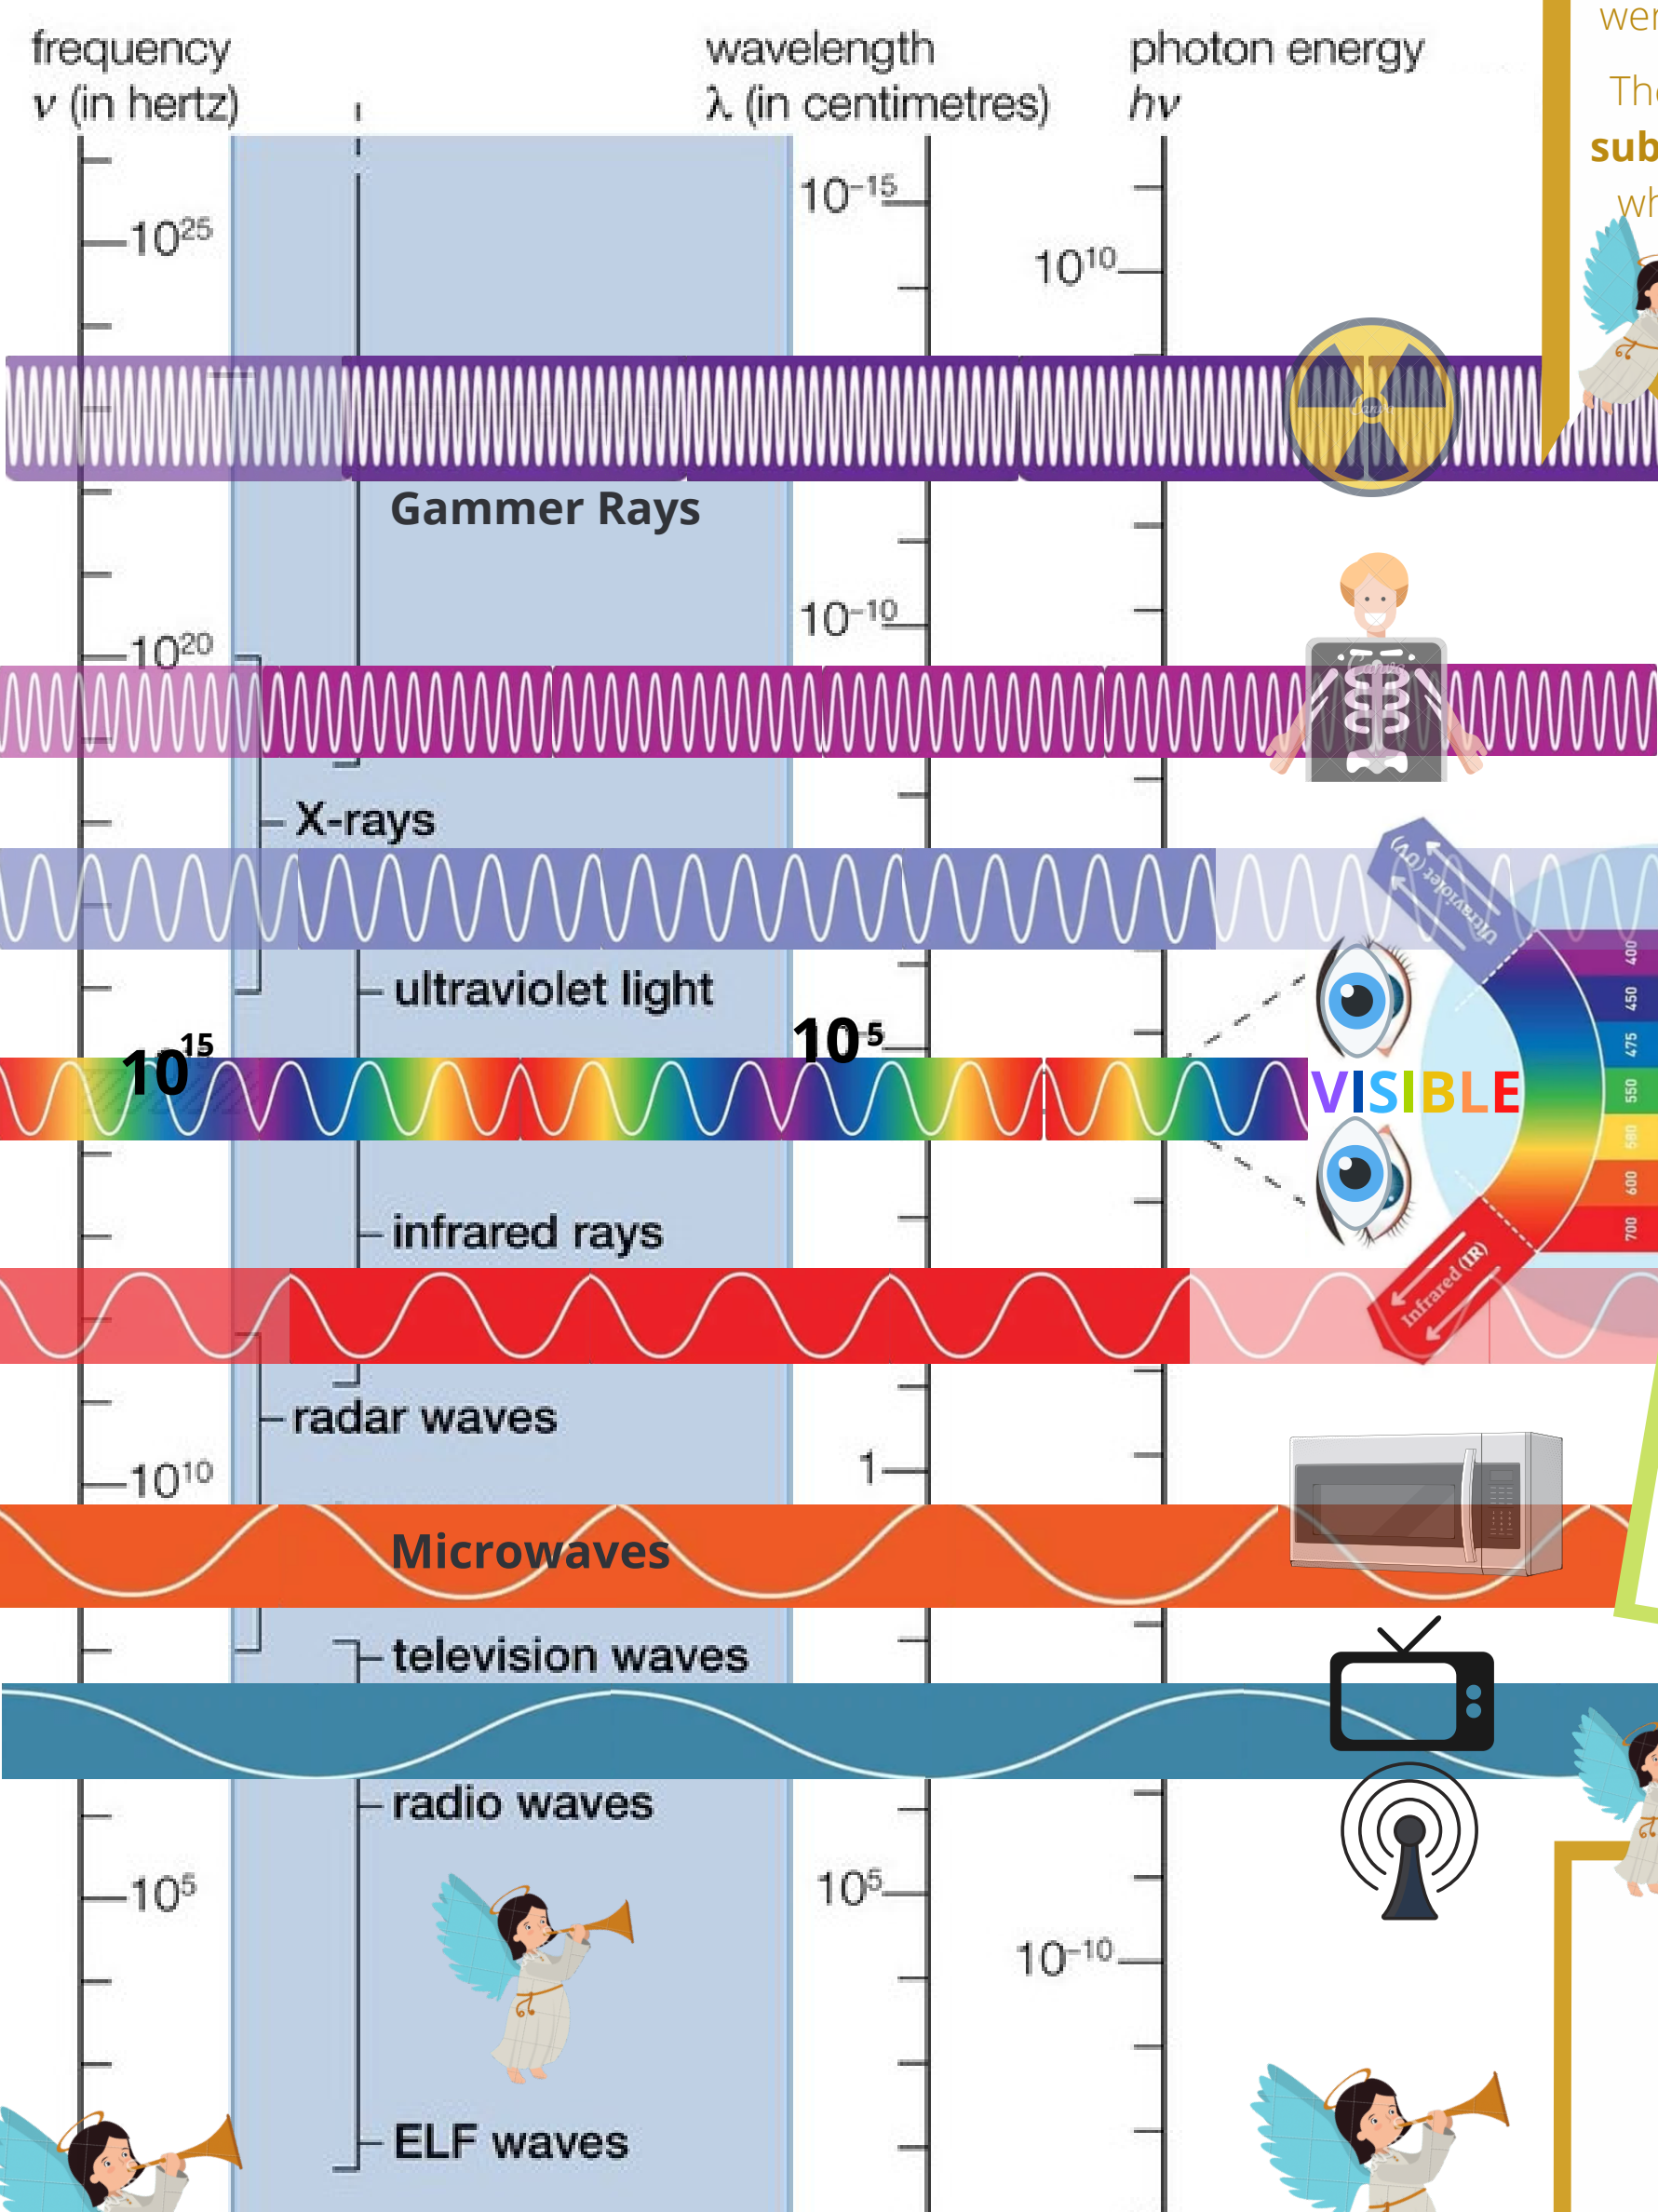

GOD'S WORD | John 6:63

The creative energy that called the worlds into existence is in the word of God. This word imparts power; it begets life."

The THINGS you see, were NOT made of things which are SEEN, but things which are NOT SEEN.

'Now faith IS the substance of things hoped for, the evidence of things NOT SEEN, Through faith we understand that the worlds were framed/prepared by the word of God, so that things which are SEEN were not made of things which do appear/are visible' **Hebrews 11:1,3**

The things we see, WERE made from things (of which faith was the substance) But they are things you don't see. The things (we don't see) which made the things (we do see) are the 2 elements found in **Genesis 1:2-3**

Energy/SPIRIT
Faith-Substance/SOUND
Both are not seen things but they make SEEN things

VISIBLE SUBSTANCE

'And the earth was without form, and void; and darkness was upon the faith of the deep. And the SPIRIT of God was hovering over the face of the waters. And God SAID, (SOUND) let there be light and there was light.'

Every created thing has sound and spirit/energy in it.

The sound in created things responds to the sound in our words and our words are spirit also.

See Proverbs 18:21 | Mark 11:22-23

Science confirms this, when you break atoms down past electrons, neutrons and protons. What you are left with is ENERGY and SOUND WAVES.

We as believers know better and can take this a step further, energy is spirit, the spirit realm. That opens up a whole different world realer than our world, the realm where all physical things we see actually came from, and this realm is all around us.

The spirit/energy in our words is what makes the invisible substance (fast moving waves) slow down into waves on the visible spectrum, that can be seen. The Invisible exists now. It just needs to slow down for you to see it.

When people see into the spirit realm God allows their eyes to pick up the spectrum of light in the 4th dimension moving twice as fast which we can't normally see.

The spectrum of light has different speeds. We are used to seeing things in 3rd dimension where what we see is a reflection of light a speed our sensory mechanisms can pick up.

What we don't see moves too fast for our eyes to pick up naturally, because our eyes send pictures of light reflections to our brains. Anything moving faster than that we won't see.
